

SCIENTIFIC AWARDS

Laboratoires de Biologie Marine Daniel Jouvance

The Cosmetics Company DANIEL JOUVANCE MARINE BIOLOGY LABORATORIES is awarding a prize of 4000 € to a young scientist working in fundamental or applied aspects of marine biology, marine chemistry, marine biotechnology or oceanography.

The topic for the 2009 prize is

Marine unicellular organisms and viruses : role in ecosystems

*Applicants (less than 30 years old) should send before **May 10 /2009***

- A Curriculum Vitae (2 pages maximum)
- a short but consistent and fully explicative abstract of the scientific work (4 pages maximum)
- a copy of the title page of published papers and thesis.

To **Daniel Jouvance Scientific Committee**
c/o Prof. Y. LE GAL
Station de Biologie Marine du Muséum National d'Histoire Naturelle
CONCARNEAU France

The documents will be sent exclusively by E-mail

y.legal2@orange.fr

The Daniel Jouvance Prize is awarded yearly since 1992. The 2007 laureate was Tom Defoirdt , University of Ghent, Belgium for his research work on quorum sensing in *Vibrio harveyi* and its perturbation by furanone compounds as alternative to antibiotics for controlling bacterial infections aquaculture. The 2008 laureate was Ed. Stockdale, University of Western Australia, Crawley, for his work on iron/calcium mineralisation in *Chiton radula*.

Daniel Jouvance Marine Biology Laboratories undertake to develop cosmetic products according to strict ethical guidelines: marine ingredients are either collected (natural origin) or grown up (marine microalgae) under environmentally sustainable conditions. The elaborated products are not tested on animals.

The Daniel Jouvance Marine Biology Laboratories initiate and support a large series of projects contributing to the advancement of marine biology and to a wide sharing of this knowledge for equitable development.
